

# BluRez Epoxy 575 CG

## URBAN SUPERWAY, SOUTH AUSTRALIA

Urban Superway is South Australia's largest road project at over \$800M and includes almost 3km of elevated freeway.

PROJECT COMPLETION: 2013

CLIENT/END USER: JOHN HOLLAND

### APPLICATION

#### WHERE WE USED BLUREZ EPOXY 575

Over 3km of elevated freeway is constructed by segmental launched segments which are match cast using our BluRez Epoxy 575CG. Approximately 60,000 litres will be used for the project

#### WHY WE USED BLUREZ EPOXY 575

BluRez Epoxy 575CG was designed to meet the extensive and stringent performance and technical specification. Our BluRez Epoxy 575CG allowed extended work time, was thixotropic and easily applied onto the precast segments and achieved 60MPa after 24 hours.

### FEATURES

- High early strength development
- Thixotropic
- Long work time

### BENEFITS

- Allowed easy application of the BluRez Epoxy 575CG onto the precast segments at all temperatures.
- Product was thixotropic
- 60MPa after 24 hours.

### SUMMARY

The properties of the BluRez Epoxy 575CG allowed the client to meet the tight production schedule throughout the year as well as the extensive technical requirements of the specification.
